#### **Computer Science, University of Brighton**

**SEPTEMBER 2019 – JULY 2022** 

Graduated with: First-Class BSc Honours degree

**Specialised in:** Object-Oriented design and architecture, cloud computing, web development, data structures, and algorithms, secure networks and systems, concurrency, and client-server

computing.

**S** Education

## Skills

React

JavaScript

Java

HTML/CSS

**Tailwind** 

PHP

SQL

Redux

Axios

jQuery

Ajax

Node.js

**Express** 

MySQL

PostgreSQL

MongoDB

REST-API

JSON

SASS

Git Jest

Agile Methodology

# **Employment History**

#### Freelance Web Developer, Essex Chelmsford

NOVEMBER 2022 - CURRENT

- Developed personalised, responsive websites for clients using React, HTML/CSS, and JavaScript ES6, resulting in high levels of client satisfaction and positive feedback.
- Implemented agile methodologies, including sprint planning and daily stand-ups, to increase project efficiency and ensure the timely delivery of high-quality results.
- Collaborated closely with clients to identify and design optimal solutions that met their needs and delivered visually stunning websites with exceptional user experiences.
- Managed multiple projects simultaneously, prioritizing tasks and delegating responsibilities to ensure the timely and successful completion of all deliverables.

#### Bartender, Las Iguanas, Brighton

FEBRUARY 2018 - NOVEMBER 2022

- Demonstrated time management skills by effectively managing busy shifts and unexpected challenges, resulting in improved overall efficiency.
- Proved **adaptability** and **flexibility**, resulting in faster order completion and improved customer satisfaction through adjusting to changing procedures and menu updates.
- Developed strong **interpersonal skills**, building **positive relationships** with customers and colleagues to ensure a welcoming and enjoyable atmosphere.
- Showcased a strong work ethic, consistently delivering high-quality service and maintaining a clean and organized work environment.

### Software Projects

#### Fin Flex

GitHub | Stacks: HTML/CSS, JavaScript, PHP, Node.js, Express, jQuery, SQL, Jest, Ajax

Created an open banking web application, which allows users to access and manage financial data from multiple banks.

- Developed a responsive web application using HTML/CSS using an agile methodology.
- Engineered a high-performance backend with **Node.js** and **Express**, delivering a scalable and reliable REST API within a **2-week sprint**.
- Implemented **Chart.js** to display API **data visualization** through the use of charts and graphs, providing better clarity to users about their financial data.
- Delivered a user-centric platform that provides a seamless experience for managing financial data, resulting in high levels of user satisfaction.

#### **Sky Cast**

Stacks: React, JavaScript, HTML/CSS, Node.js, Express, Axios, PostgreSQL, Jest

Designed a weather-based tracking app to display real-time weather data from a third-party API.

- Integrated the Axios library to efficiently fetch real-time weather data from a third-party **API**, ensuring the information remains accurate and up to date.
- Created an application that effectively retrieves and manages data within state hooks, providing users with a seamless and interactive experience.
- Utilised React to design and implement a visually appealing, responsive interface that provides a user-friendly experience on a range of devices.
- Developed and tested the application using **Jest**, ensuring its functionality and reliability.

#### **Sports Market Application**

GitHub | Stacks: React, HTML/CSS, JavaScript, Node, Express, Axios, PostgreSQL, Jest, Supertest Created a dynamic and responsive user interface and a robust backend solution for real-time sports betting market data collection and display.

- Utilised **Axios** to fetch and display real-time sports data from the backend API, improving the user experience with up-to-date information.
- Implemented Redux to efficiently manage application state, ensuring smooth data flow and seamless navigation.
- Created a scalable, maintainable, and high-performance Rest-API system design, by adopting the MVC architecture for optimized performance.
- Implemented seamless and efficient market data storage and retrieval, by designing a database schema for PostgreSQL and Sequelize ORM, enabling robust historical analysis and reporting.
- Developed automated unit and integration tests using Jest and Supertest to ensure the application's functionality and reliability.

### Achievements

#### Winner of the Second Annual Codefest

I won the second annual codefest in the second-year category. A competitive university event that allowed me to apply my coding skills, and critical thinking skills, and complete tasks in a highly competitive environment. Tasks included navigating data structures, creating a simple weather app for pilots, and an array of abstract problem-solving.
